NERVOUS CONDITIONS
Science and the Body Politic in Early Industrial Britain
Elizabeth Green Musselman

Examines nineteenth-century scientists’ obsession with nerves and the nervous system.

Nervous Conditions explores the role of the body in the development of modern science, challenging the myth that modern science is built on a bedrock of objectivity and confident empiricism. In this fascinating look into the private world of British natural philosophers—including John Dalton, Lord Kelvin, Charles Babbage, John Herschel, and many others—Elizabeth Green Musselman shows how the internal workings of their bodies played an important part in the sciences’ movement to the center of modern life, and how a scientific community and a nation struggled their way into existence.

Many of these natural philosophers endured serious nervous difficulties, particularly vision problems. They turned these weaknesses into strengths, however, by claiming that their well-disciplined mental skills enabled them to transcend their bodily frailties. Their adeptness at transcendence, they asserted, explained why men of science belonged at the heart of modern life, and how a scientific community and a nation struggled their way into existence.

“This book is erudite, fluidly written, exhaustively researched and documented—and entertaining. The way Green Musselman moves between literary, scientific, philosophical, and theological sources makes this a particularly impressive cultural history. A rich and engaging account of science’s anxiety about its own empirical authority, it makes a valuable contribution to the history of science.” — Joel Faflak, coeditor of Nervous Reactions: Victorian Recollections of Romanticism

Elizabeth Green Musselman is Associate Professor of History at Southwestern University.

MARXISM AND NATIONAL IDENTITY
Socialism, Nationalism, and National Socialism during the French Fin de Siècle
Robert Stuart

Provides the first sustained analysis of the collision between Marxism and nationalism in France at the time of the Dreyfus affair.

Post-Marxists argue that nationalism is the black hole into which Marxism has collapsed at today’s “end of history.” Robert Stuart analyzes the origins of this implosion, revealing a shattering collision between Marxist socialism and national identity in France at the close of the nineteenth century. During the time of the Boulanger crisis and the Dreyfus affair, nationalist mobs roamed the streets chanting “France for the French!” while socialist militants marshaled proletarians for world revolution. This is the first study to focus on those militants as they struggled to reconcile Marxism’s two national agendas: the cosmopolitan conviction that “workingmen have no country,” on the one hand, and the patriotic assumption that the working class alone represents national authenticity, on the other. Anti-Semitism posed a particular problem for such socialists, not least because so many workers had succumbed to racist temptation. In analyzing the resultant encounter between France’s anti-Semites and the Marxist Left, Stuart addresses the vexed issue of Marxism’s involvement with political anti-Semitism.

“This is an enormously learned, thorough book on an important topic—nationalism and xenophobia versus international solidarity in the French nineteenth-century labor movement. It will become a standard reference for years to come.” — Marcel van der Linden, International Institute of Social History and author of Transnational Labour History

Robert Stuart is Associate Professor of History at the University of Western Australia and the author of Marxism at Work: Ideology, Class, and French Socialism during the Third Republic.
